SUMMARY

Application Developer with hands-on experience in full-stack web application development, building and enhancing enterprise applications using TypeScript, JavaScript, React.js, Node.js, GraphQL, MySQL, and Azure. Experienced in developing APIs, implementing business logic, integrating data sources, troubleshooting complex application issues, and delivering production-ready solutions. Strong understanding of the software development lifecycle, Agile practices, and cloud-based application development, with a focus on building scalable, maintainable, and reliable software.

EXPERIENCE

Application Developer | IBM (via iBridge Techsoft Pvt Ltd) | Nov 2024 – Present Bengaluru, India

- Develop and enhance enterprise web applications, contributing across frontend and backend components based on business and application requirements.
- Develop and maintain GraphQL APIs and TypeScript-based backend services, including resolvers, business logic, data processing, and integrations with application data sources.
- Implement frontend enhancements using React.js and JavaScript, ensuring seamless integration with backend APIs and application workflows.
- Work with MySQL and other data sources to support application functionality, troubleshoot data-related issues, and validate end-to-end application behavior.
- Investigate and resolve application defects and production issues by analyzing API responses, application logs, database data, and monitoring information to identify root causes.
- Participate in code development, testing, debugging, deployments, and production support across multiple environments.
- Collaborate with cross-functional teams in an Agile environment to understand requirements, implement solutions, review changes, and deliver application enhancements.
- Work with Azure, Git, Postman, Dynatrace, Jira, and ServiceNow as part of the application development and delivery lifecycle.

EDUCATION

Master of Computer Applications (MCA) - Artificial Intelligence & Machine Learning

Lovely Professional University | Online | Jan 2026 – Present

Bachelor of Computer Applications (BCA)

Raichur University | 2024

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java

Frontend & Backend: React.js, Node.js, Express.js, GraphQL, REST APIs, HTML5, CSS3, Bootstrap, Tailwind CSS

Database & CMS: MySQL, SQL, Jahia CMS

Cloud & Development Tools: Azure, Git, Bitbucket, Postman, Jira, VS Code, CI/CD

Engineering: OOP, Data Structures & Algorithms, Debugging, Problem Solving, SDLC, Agile

AI: Generative AI, Prompt Engineering

CERTIFICATIONS

- **Python Full Stack Development** – PySpiders Training Institute
- **Complete Web Development Course** – Udemy
- **Genrative AI** – Udemy

PROJECTS

Pneumonia Detection using Deep Learning | Python, TensorFlow/Keras, DenseNet-169, NumPy, Pandas

- Developed a deep learning model for automated pneumonia detection from chest X-ray images using the DenseNet-169 architecture.
- Performed image preprocessing and dataset preparation to train and evaluate the model.
- Applied deep learning techniques to classify X-ray images and evaluate model performance.

E-Commerce Web Application | Python, Django, HTML, CSS, JavaScript, SQL

- Developed a full-stack e-commerce web application using Django, implementing core functionality for product management, user interactions, and order workflows.
- Designed backend components and integrated database operations using SQL.
- Developed responsive web interfaces and integrated frontend components with backend functionality.
